The 4 data export variants for the TGM5 - a combination of any is possible

Via Bluetooth to a custom made „glasmacher electronic USB – Bluetooth dongle“ and the TGM result as keystroke into Excel for example

 **Bluetooth**

0-2,5 Volt

The TGM result is transmitted to a PLC as an analogue signal by cable.

 **Bluetooth**

The result is sent to a smartphone via Bluetooth. By a special „glasmacher android App“ you get an extensive data record with time, date door and the scanned Car Identification. This is sent to a PC via email.

The result is sent to Excel for example as a keystroke via a special USB cable.
